

GUARDING VISION

Mobile & PC Surveillance Software

Monitor Everything. From Anywhere. At Any Time.

GUARDING VISION

What is Guarding Vision?

Guarding Vision is a powerful cloud-based surveillance platform designed to work seamlessly with DVRs, NVRs, and IP cameras. Using advanced Cloud P2P technology, it gives you instant access to live camera feeds from anywhere in the world — on your phone, tablet, or computer. No complicated network setup. No outdated configurations. Just simple, reliable security at your fingertips.

Key Features

■ Video Playback Search and review recorded footage whenever you need it — access every key moment on demand.	■ Real-Time Notifications Instant push alerts sent to your smartphone the moment motion is detected.	■ Two-Way Remote Communication Speak directly through connected cameras — ideal for visitor management and deterrence.
■ Video Intercom Answer door calls remotely using video intercom devices integrated into the app.	■ Remote Arming Arm or disarm your security control panel from anywhere using the app.	■ Device Sharing Share access to your cameras with family or staff, with customizable permissions per user.
■ Fingerprint Login Secure, convenient biometric login — fast access without compromising security.	■ Motion Detection Alarms Automatically triggered alerts keep you informed of any suspicious activity.	■ Fast Local Hosting Servers Low-latency connections for smooth, reliable live viewing performance.

Who Is It For?

■ For Small Businesses Get easy, 24/7 access to all your surveillance devices without complex network setup. Use VCA (Video Content Analysis) technology to review exactly what happened in your shop — at any time, from anywhere. Stay on top of your business even when you're not on-site.	■ For Home Surveillance Whether you're at work or on vacation, receive an instant alert when someone approaches your property. Use two-way audio to speak with visitors remotely, or trigger a pre-recorded message — giving your home a powerful layer of intelligent protection.
